FISCHERSPORTS.COM

#LIVETOSKI

We take skiing seriously. Both Alpine and Nordic skiing.

Our devotion, commitment, and passion for skiing are what drives us. This passion and dedication have fostered a culture of great product innovation. It is hardwired in us. Our vision as a brand is to be the athlete's number one choice. We see it as our calling to enable new heights of individual performance and unforgettable moments with innovative, user-friendly products.

By doing so, we believe we will enable more people to find and share this passion, because to us skiing is not a lifestyle. It's life.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.
FISCHERSPORTS.COM

THE CHOICE IS YOURS

- RACE**
Athletic individuals focused on improving and maximizing their performance and like to pace themselves with others. Races can be an integral focus of these consumers and be something they participate regularly.
- PERFORMANCE**
Athletic individuals seeking to improve personal fitness (from beginners to intermediate and skilled xc skiers), who are not necessarily race ambition.
- ACTIVE**
Recreational skiers and newbies, who want to get out in the winter landscape for well-being and fitness activities.

The final product offer should be taken from the country price lists. Colors and technical specifications in the catalog may deviate from the original. Rights reserved for unannounced changes and typographical errors. © October 2024.

BETTER. LIGHTER. FASTER.

THE NEW SPEEDMAX SERIES.

The next generation of the incredibly successful Speedmax system is at the starting line: Skis, boots and bindings developed on the World Cup and perfected for competitive athletes on the hunt for featherweight precision, unbeatable power transmission and maximum speed.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

SKI CHARACTERISTICS

SKATING 610

Comparison: half vs. full body weight
Medium contact areas combined with tip and tail splay for a ideal balance between stability and agility.

SKATING 61K

Comparison: half vs. full body weight
Shorter contact areas and pronounced splay in tip and tail for more agility and speed. Ideal for soft snow conditions.

SKATING 115

Comparison: half vs. full body weight
Wider contact areas and minimum splay in tip and tail for more stability and control. Ideal for hard snow conditions.

CLASSIC 902

Comparison: glide vs. kick
Shorter contact areas and large splay in tip and tail provide maximum speed in soft or wet snow conditions. Camber construction creates perfect grip when using klister or soft dry wax in soft or wet snow conditions.

CLASSIC 702

Comparison: glide vs. kick
Shorter contact areas and large tip and tail splay for maximum speed in universal snow conditions. Camber construction for perfect grip when using dry wax in all snow conditions.

CLASSIC 812

Comparison: glide vs. kick
Longer contact areas and reduced tip and tail splay for maximum speed in hard or cold snow conditions. Camber construction for perfect grip when using dry wax in hard or cold snow conditions.

THE ALL-NEW SPEEDMAX 9 RL BOA.

The Speedmax success story dials it up to the next level. The brand new Speedmax 9 RL BOA impresses with its innovative two-zone BOA® system, which enables individual adjustment in the heel and forefoot area. Thanks to the lower foot position combined with the new chassis for improved torsion control, you feel the ski like never before. The result of less stress on the feet means more power transfer and higher speed on the snow.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

SKIS TECHNOLOGY

BASE FINISH		
FINISH FIRST  The finishing touch comes from Finish First: the term that covers and unites all the individual technological steps in the course of the final treatment of the base.	DIAMOND TUNED GRINDING (DTG) WORLD CUP PLUS / COLD / PLUS COARSE  PLUS: Optimised Plus grinding finish from the World Cup with universal range of use. It is suitable for all types of snow and ensures the best speed in a wide range of temperature. COLD: Cold grinding finish from the World Cup. The very flat structure is best suited for very cold temperature and particularly fine snow conditions. PLUS COARSE: Special grinding finish from the World Cup. The deeper and coarser structure is perfectly suitable for coarse-grained and moist snow at temperatures of 0°C and warmer.	
SPEED GRINDING 2.0  Reworked universal stone grinding for perfect gliding properties in all snow conditions.	ULTRA TUNING  Unrestricted gliding. Offset base structure makes the ski fast and suitable for all uses.	PREWAXED  Prepared with glide wax for best gliding properties, protection against dirt and oxidation. Powered by Vauhti.

CONSTRUCTIONS & CLIMBING SYSTEMS		
WORLD CUP TIP  The lower and shorter tip construction follows the demands of real racing. It reduces the ski's swingweight to a minimum, enabling highest agility.	HELIUM SHIELD  A exclusively developed mix of carbon and glass fiber laminates enables Fischer to significantly reduce the weight of the ski well-maintaining the same torsional stability and performance characteristics.	COLD BASE BONDING  The revolution in ski making: Speedmax technology to protect the homogeneous molecular structure of the base for perfect wax absorption. Guarantees maximum speed.
GLIDING SIDEWALL  Newly introduced World Cup technology is a thin waxable layer on the sidewalls to reduce friction for more speed with less energy. Waxable with liquid wax only.	SKATING 610  Race-specific skate ski construction for maximum speed with pressure relief at the ski tip and tail. Perfect on compact to soft snow.	SKATING 61K  Special race skate ski construction for maximum speed through increased pressure relief at the ski tip and tail. Perfect on soft snow.
SKATING 115  Skate ski construction with wider contact areas and minimum splay in tip and tail for increased stability and control. Ideal for hard snow conditions.	SKATING AEROGUIDE  Moderate tip splay of the ski combined with strong sidecut and two guide grooves for excellent stability with good gliding properties. Perfect for learning and improving technique.	CLASSIC 902  Classic race ski construction with noticeable pressure relief at the ski tip and tail for a direct, quick, and safe kick phase. Ideal for: Universal to wet conditions; klister.
CLASSIC 702  Classic race ski construction with large tip and tail splay and long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: Cold conditions, dry wax conditions.	CLASSIC 812  Classic race ski construction with long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: Cold conditions; dry wax conditions.	PRECISION PAIRING SYSTEM  The next generation in ski pairing: fully automatic dynamic measurements of a multitude of pairing criteria ensures precise ski choice and optimised pairing.
COMPUTER FLEX CONTROL  Minimises differences in residual tension and camber pressure. Top climbing and kick performance.	FISCHER CARBON FIBRE  Multiaxial T300 1K carbon fibre. High strength and minimum weight laminate.	NORDIC ROCKER CAMBER  Slightly opened ski tips for perfect gliding properties in unprepared terrain. Enables lighter turning with less effort.
RENTAL TAIL PROTECTOR  Special components for extremely robust ski tails ensure they fulfil the durability requirements of ski rental.	POWER LAYER  0.2mm thin, extremely lightweight, full-surface high-pressure laminate comprising natural fibres and resin for noticeable ski weight reduction.	POWER EDGE  Reinforced ski chassis ensures longer service life. Homogeneous pressure distribution ensures uniform wax wear.
STEEL EDGE  Narrow steel edge along the entire length of the ski. Guarantees constant edge contact on every surface.	TWO GROOVES  Two parallel, continuous grooves in the base provide improved stability and control while gliding.	EFFICIENT FORWARD  Thanks to the revolutionary composition of proven materials the elasticity of the body of the ski is extremely increased: this guarantees a forgiving kick action and a new, easy-going skiing experience.
TWIN SKIN  Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair / Mohair mix skins ensure you can rely on the kick action.	OFFTRACK CROWN  Climbing system in all terrain, especially away from the prepared tracks and also in difficult terrain conditions. Developed exclusively for Fischer.	FISCHER EASY SKIN  The easiest way to attach climbing skins: combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.
OFFTRACK CROWN & FISCHER EASY SKIN  Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Like a switch-on all – wheel drive.	SUPER SKIN  Full-length climbing skin, which is easily attached by metal hooks at the end of the ski and elastic attachment in the ski tip for steeper ascents and more grip.	DUAL SKIN  The combination of Easy Skin and Super Skin: Depending on the terrain and snow conditions, you can easily switch between the two proven climbing skins.

CORES		
BIDIRECTIONAL AIR CORE  Fischer's lightest core thanks to the bidirectional Air Core construction combined with highly modular carbon fibres and Fischer's proprietary Cold Base Bonding process.	AIR CORE HM CARBON  Proven Air Core material with over 80% air content for extremely light weight combined with duroplast and carbon fibres and Fischer's proprietary Cold Base Bonding process.	AIR CORE CARBON  Proven Air Core material with over 80% air content for extremely light weight combined with duroplast and carbon fibres as well as Fischer's proprietary Cold Base Bonding process.
AIR CORE BASALITE PRO  Very lightweight and torsion-free Air Core construction with highly stable sidewalls. Duroplast combined with volcanic basalt fibers for perfect flex characteristics regardless of temperature.	AIR CORE BASALITE  Lightweight combination of proven Air Core material and extremely lightweight wood with specially grooved air channels. Volcanic basalt fibers for perfect flex characteristics regardless of temperature.	AIR TEC BASALITE  Core made of extremely lightweight wood with special air channels combined with stable sidewalls. Volcanic basalt fibers for perfect flex characteristics regardless of temperature.
AIR CHANNEL BASALITE  Durable, weight-reduced wood core, thanks to specially grooved air channels, combined with stable sidewalls. Basalt fibers for perfect flex properties regardless of the temperature.	AIR TEC STEEL EDGE  Weight-optimized wooden core with specially grooved air channels in combination with the use of steel edges.	AIR CHANNEL  Durable, weight-reduced fiberglass wood core with specially grooved air channels, combined with stable sidewalls.

BOOT TECHNOLOGY

TECH FEATURES		
SPEEDMAX CARBONFUSED CUFF  This cuff is manufactured with CARBONFUSED® Technology, which fits like a glove while providing outstanding side stability combined with unrestricted dorsiflexion. The Velcro fastener, which can be replaced without tools, simplifies replacement if necessary.	WORLD CUP CARBON CUFF 2.0  Ultralight carbon cuff ensures extremely light weight, excellent side stability and best forward freedom of movement.	HINGED POLYMER CUFF  Ergonomic molded cuff for remarkable side hold with good freedom of movement to the front and back. Easy to adjust with Velcro fastener. Canting and EVA padding depending on model.
ANKLE SUPPORT CUFF ASC3  Stable at the side, movable forwards: newly developed ankle support with pivot joint for optimum power transfer, individually adjustable thanks to Powerstrap.	EXTERNAL ANKLE SUPPORT EAS  Anatomical ankle support for a stable hold and power transfer for either skiing technique Individually adjustable through Powerstrap.	INTEGRAL CARBON CHASSIS  Outer sole, insole and side stabilisation elements manufactured from the same sheet of carbon. For previously unattained light weight with optimum stability power transfer.
CARBON HEEL COUNTER  Heel counter made of high-quality carbon fibres. It holds the World Cup Carbon Cuff on the one hand and gives you an optimum heel fit and robust protection on the other.	INJECTED EXTERIOR HEEL CAP  Good heel cradling and robust protection all in one: exterior heel cap for even better power transfer.	INTERNAL MOLDED HEEL CAP  Internal anatomically shaped heel cap. Very light and individually thermoformable.
CARBON ZONE CONTROL  Carbon Zone Control enables to provide the optimal flex and torsion stiffness throughout all cross-sections of the integral carbon chassis. Mindfully designed geometrie and carbon-layup for the individual needs of skating, classic or combi boots on cutting-edge race level.	CARBON FUSED TECHNOLOGY  Ergonomic molded cuff and/or heel counter with carbon fiber reinforced polymer structure for impressive power transfer, low weight and secure, comfortable fit.	BOA® FIT SYSTEM - LI2  The BOA LI2 dial platform offers a low-profile design, unprecedented durability, and improved sustainability. With incremental micro-adjustability in both directions, LI2 is the ultimate choice for a fast, effortless, and precision fit.
INTERCHANGEABLE CUFF  Screw-mounted cuff enables easy maintenance and personalization if another cuff size is required. Torx T20 flat head stainless steel M4x8mm screw is secured with Loctite blue threadlocker.	FISCHER SPEED LOCK SYSTEM  Revolutionary quick lock with minimum size and weight. Simply pull the laces tight – that's it! The system is safe and reliable.	WATER RESISTANT DESIGN  Highly water resistant boot design with a breathable membrane connected to the lining. Triple-F membrane prevents the boot from moisture when dealing with wet conditions, and speeds up drying time between ski sessions.
TRIPLE-F MEMBRANE  Special membrane ensures that conditions inside the boot are perfect: dry, warm and breathable.	SEAMLESS UPPER  No-stitching seams in the upper material is not just a matter of aesthetics, it provides also best protection against water and long lasting bonding.	THERMO MOULDBABLE DESIGN  Boots featuring TMD are ready for custom boot fitting. All materials used for the shoe upper are adaptable with heat and special tooling. Easy work for boot service staff and boot-fitters. Optimized fit for consumers with individual orthopedic needs like hallux valgus or ganglions.
SEALED ZIPPER  The specially sealed zipper system ensures that any moisture is kept out.	INTEGRATED GAITER  Integrated, easily adjustable gaiter for optimum protection in deep snow. Waterproof lightweight material and sealed zip for maximum cross country skiing enjoyment even in untracked terrain.	LACE COVER  Lace covers for additional protection against the snow and wet conditions and to give you a comfortable warm feeling.
GAITER RING  Fastening for all popular gaiter models for additional protection against the snow and wet conditions.	LEATHER UPPER  Natural upper material made of real leather which has been treated a number of times. Follow enclosed care instructions.	COMFORT GUARD  Very lightweight, water-repelling insulation material for additional thermal protection in the forefoot and toe area.
ORTHOLITE® INSOLE  OrthoLite insoles are designed to improve comfort, performance, and long-term cushioning while creating a cooler, drier, and healthier environment in every boot.	THERMO INSOLE  Insole with fleecy top layer and aluminium-lined lower layer for ideal insulation to keep out the cold.	THERMO FIT  Thermally formable foam cushioning with outstanding thermal insulation – a perfect fit for the individual shape of the foot. Heat boot to max. 85°C (185°F) in oven. Step in with socks and tighten laces. Foam adapts automatically. Allow 7-10 min of cooling time.
EXTENDED FIT SYSTEM  The dual insole system offers additional fit control. Less volume for slim feet or more space for growing feet. Just add or remove EVA-layer under insole.	FISCHER FRESH  Fischer Fresh puts an end to unpleasant odours, giving you lasting freshness inside the cross country skiing boot with a pleasant smell and feeling inside.	VELCRO STRAP  Tool-free interchangeable Velcro fastener simplifies replacement if needed.
EASY-FIX VELCRO  Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.	EASY ENTRY LOOPS  Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.	NFC  There is an NFC tag in the right boot sole. Scanning the NFC with a smartphone will open the specific boot model product info on the Fischer website. The UID code can be integrated into digital rental systems.
MADE IN EU  Cross country boots “made in Europe” set the highest standard for our premium products and decrease Fischer's ecological footprint in line with our brand values.	PVC-FREE  We refrain entirely from using PVC (Polyvinylchloride) on boots with the 100% PVC-free logo.	
BOOT FIT CONCEPT 		
RACE FIT Boot fit concept made for racing. Narrower last and less volume for close fitting. Thus direct power transfer and enhanced ski control.	RACE FIT WS For female racers. High comfort thanks to specially developed women lasts with narrow heel and forefoot, as well as higher instep area and close fit. Thus direct power transfer and improved ski control.	COMFORT FIT For sportive and touring consumers. Comfortable last for all-rounder. Ensuring perfect hold and stability. Generous padding and more freedom in the toe and forefoot area lead to more warmth and convenient sensation.
COMFORT FIT WS For the female Nordic skier requirement. Great comfort thanks to the use of special women lasts with narrower heel and reduced instep. Advanced insulation due to fleece lining and fleece sockliner lead to more warmth.	JUNIOR FIT Boot concept designed for young feet. Junior specific last for excellent foot hold. Proper flexibility and increased insulation.	
TURNAMIC® SPEEDMAX SOLE 25  Two-piece TURNAMIC® soles are optimized for racing with the Speedmax boot chassis. They provide a lower stance, reduced weight, wider support, and minimal snow adhesion.	TURNAMIC® SPEEDMAX SOLE  Lightweight 2-piece TURNAMIC® outsole provides optimal flex.	TURNAMIC® RACE SKATE  Extremely sporty skating sole made from Pebax® or Desmopan®. Chassis made of hard material for better power transfer. Arch support for stability and extra torsional stiffness.

BOOT TECHNOLOGY

OUTSOLES		
TURNAMIC® RACE CLASSIC  Extremely sporty classic sole made from Pebax® or Desmopan® gives you a lower stand height for more stability. Flex grooves and soft sole flex support the smooth kick.	TURNAMIC® PERFORMANCE  The robust and flat construction for sporty, classic style skiing enables a longer gliding phase through easier balance. 2K-Desmopan® material mix for improved performance.	TURNAMIC® EASY WALK  A new wider sole profile and softer material provides a smooth skiing flex and easier off-ski walking.
TURNAMIC® TOURING  The flat construction enables a safe walk and good balance on the skis. The profile is non-slip and self-cleaning. The wear-resistant 1K-Desmopan® material mix is long-lasting and acts against the cold.	TURNAMIC® JUNIOR  The flat, robust construction enables a good stance and easier balance. The profile is non-slip, self-cleaning and Desmopan® acts as an insulation layer against the cold.	ROTTEFELLA® XPLORE  Innovative BC sole featuring integrated spring-pin technology. To be used with ROTTEFELLA® Xplore binding system.
ROTTEFELLA® BC  Optimum support in difficult terrain. Reliable walking thanks to non-slip profile.		

BINDING TECHNOLOGY

TECH FEATURES		
TURNAMIC® INTEGRATED FIXATION PLATE (IFP)  Modern interface for screw-free binding mounting on the ski. The two-part TURNAMIC® “Integrated Fixation Plate” is weight-optimised and enables you to adjust ski performance without tools in 7 click-in settings.	SAFE LOCK  Lightweight locking mechanism eliminates accidental openings due to errant pole or ski hits. An audible click confirms that the lever is locked.	TURN LOCK  The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.
TOOL FREE  No tools are required for mounting and assembly and this is optimised for easy handling even in difficult conditions on the track. A clearly visible display in the windows next to the setting unit and the click-in presetting make positioning even easier.	DOUBLE LOCK SLIDER  Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).	CLIP LOCK  Clip for easy fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).
FLOWFLEX®  The two-part plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.	TORSION-PROOFED BODY  The well-thought-out (in all details) housing construction with broad contact surface and torsionally stiff geometry is the basis for direct power transfer. Previously unattained ski control and forward thrust go hand in hand with low weight.	STABILIZER  The shape of the skate housing keeps the ski balanced horizontally after every kick. Perfect ski control – even when the ski is in the air.
HEEL PRE-ADJUST  Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.	LOW PROFILE  The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel or the snow at the same time.	STEP-IN  The Step-In mechanism makes it extremely easy to step into the binding. You can hear a clear ‘click’ when the binding is closed properly.
SKATING FLEXOR  Flexor developed for skating style with flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.	CLASSIC FLEXOR  Flexor developed for classic style with flex grade 7.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.	JUNIOR FLEXOR  Flexor developed for the target group with flex grade 5.0 and slightly progressive power flow. It ensures the best ski control from the beginning of the Motion and a secure fit inside binding housing. Low-wear materials are what make this high-performance absorber stand out.

● スキー取扱における注意事項

- スキー表面本体に粘着テープを直接貼ると、表面クリアシート剥離の原因になります。
- 滑走面への過度なチューンナップ加工、研磨等は本来の滑走性能を著しく低下させる原因になります。
- スキー本体に過度な熱が加わると、ビンディング取付プレート剥離の要因になります。
例1 通常のホットワックス塗作業以外に、スキー本体に熱を加える作業。
例2 オフシーズン等、高温となる場所での保管。
